Putting Stars on the  
Map

## About Jaza Energy

- We are renewable energy tech startup in Tanzania.
- We provide battery rental services to last mile communities in Kigoma, Mtwara, and Pemba.

We exist because:

- Our customers cannot power what they want at a price they can afford.
- Our customers are not living their best lives.
- Our customers are not connected to the rest of the world.

We are putting stars on  
the map!

## How we put stars on the map

- We go into last mile communities;
  - We build solar powered hubs;
  - We recruit and train women from these communities. We affectionately refer to these women as Jaza Stars. They are the most important person in the organisation.
  - The Jaza Stars operate the technology in the hubs and provide our world class battery swap services.
- 

## Our journey so far

- Built 88 solar powered hubs
- Trained 140 Jaza Stars
- Powered 7616 homes
- Served 48,742 people
- Reduced CO2 emission to 2806

We are changing the way the world thinks about

- Powering rural communities
- Energy needs in rural communities
- Rural women as a vital human resource
- Women working with technology
